CONCEPT STATEMENT

The rustic, organic, and playful ambient lights design inspiration comes from northern Minnesota's forests. Light shines between the cylindrical tree arrangement mimicking the sun rays bursting through trees in a forest. Whimsical wire tops the tree playfully impersonating the organic branches of trees. The sliced wood base is strong and grounded imitating a forest floor that holds the roots in place.

BETHANY BERTRAM

Is currently a junior Interior Design student at the University of Minnesota - Twin Cities. She was born and raised in the suburbs of Minneapolis, Minnesota. She has fond memories of going "Up-North" to the family cabin on the lake. Her hobbies include kayaking, camping, reading, hiking and traveling. She is passionate about design, sustainability, and all forms of art.
